Letter No.: 92-72

SUBJECT: BabyCal Campaign Update

REFERENCE: ACWDL 92-24, ACWDL 91-91 and ACWDL 91-37; Information Letters
Dated July 18, 1991 and July 30, 1991

This letter is to let you know that, beginning in mid November 1992, the Department's BabyCal Outreach Campaign will release new advertising commercials utilizing television, radio, billboards, etc. to communicate the Department's expanded message for Phase II: "Take care of yourself while pregnant, your baby is counting on you."

During the evaluation of Phase I, we conducted interviews with 800 low-income pregnant women throughout the State. It was very encouraging to learn that 84 percent of the respondents recalled advertising related to prenatal care and having a healthy baby. Sixty-one percent specifically recalled our BabyCal advertising. While awareness is important, it is action that is the greatest indicator of success. That is why we were pleased to learn that 29 percent of the pregnant women surveyed who had unaided recall of our advertising said that they made an appointment for prenatal care as a result of our advertising, and 27 percent of these women applied for Medi-Cal as a result. This news is encouraging and we hope to increase these percentages over the next few years.

Based on the evaluations and feedback we received during Phase I, we learned that our initial message, "Get prenatal care. The State of California can help you," was effective and valuable. However, it was time to expand our objective. There are additional messages that pregnant women need to hear and understand if BabyCal is going to have a significant and long term impact on low birth weight and infant mortality. Based on research and input from health care professionals, it was decided that our new expanded message should target a pregnant woman's lifestyle and habits, with an emphasis on the consequences of unhealthy behavior.

With these new objectives in mind, the BabyCal campaign has broadened its focus to include the need for healthy behavior and the risks of drug, alcohol and tobacco use during pregnancy.
