- Proposition 56 funds to increase provider payments, family planning services, developmental screenings, and trauma screenings
- Value Based Payment Program to improve care for certain high-need, high-cost populations

Governor's Focus on Children

- Commitment to early childhood development
- Emphasis on populations that are at-risk or low-income (Medi-Cal)

Governor's Requests

- Partnership and collaboration as California increases our state's commitment to early childhood development
- Asked all California health plans to review their current networks, processes, outreach and metrics for pediatric screenings and services
- Directed DHCS to review its data in regards to pediatric measures and identify areas that require improvement

DHCS Quality Strategy

- Three Linked Goals
 - Improve the health of all Californians
 - Enhance quality, including the patient care experience, in all DHCS programs
 - Reduce the Department's per capita health care program costs
- Seven Priorities
 - Improve patient safety
 - Deliver effective, efficient, affordable care
 - Engage persons and families in their health
 - Enhance communication and coordination of care
 - Advance prevention
 - Foster healthy communities
 - Eliminate health disparities

Quality Measures

Survey Results

- Survey sent to all MCPs and stakeholders through the MCAG, regarding the current EAS and modifications for MY 2019.
- Asked the following 4 questions:
 1. Are there gaps in the current EAS?
 2. Are there any measures DHCS should consider removing from the current EAS?
 3. Are there any measures DHCS should consider adding to the current EAS?
 4. Are there measures DHCS should consider running internally based on encounter data?

Survey Results

- Gaps in the current EAS:
 - Behavioral health, including opioid measures
 - Care coordination
 - Member experience
 - Child preventive services
- Consider removing from the current EAS:
 - Measures to which DHCS does not hold MCPs to the MPL
 - Measures where DHCS is doing well (e.g., Comprehensive Diabetes Care – nephropathy testing)
 - Redundant measures (e.g., HbA1c testing)

Survey Results

- Consider adding to the EAS:
 - All CMS Child Core Set measures
 - Developmental Screening in the 1st 3 Years of Life
 - Well Child Visits in the 1st 15 Months
 - Colorectal Cancer Screening
 - Chlamydia Screening
 - HIV related measures
 - Prenatal Immunization Status
 - Adult Immunization Status
- Most suggested additions were either Adult or Child Core Set measures

Survey Results

- Other feedback:
 - Switch from CIS-3 to CIS-10 in include additional childhood vaccines and align with NCQA
 - Align measures with those that NCQA accredited health plans are required to report on
 - DHCS should raise the current MPL which is set at the 25th percentile of all Medicaid plans nationally
