Enrollment Process - Enrollment Assistance at HCO

- DHCS created a screening process with stakeholder input to allow a beneficiary's representative (i.e. their enrollment assistant) to call HCO and make an enrollment decision on their behalf.
- Can help beneficiaries without an authorized representative in the system to have friends and family call HCO with enrollment choices.
- Safeguards include:
 - The caller will need to be able to attest to their designation by the beneficiary to make an enrollment decision as well as a lack of conflict of interest, and that will be recorded.
 - Confirmation of the change will be mailed to beneficiary, alerting them to the change.

Care Coordination

- DHCS working internally and with partners to improve care coordination in Cal MediConnect
 - Care Coordination Landscape Assessment
 - Health Plan CMO meetings
 - Health Plan/Mental Health Plan Coordination
 - Provider Outreach – IE Provider Summit June 23rd
 - Beneficiary Toolkit Revisions

Multipurpose Senior Services (MSSP) Transition

- Proposed TBL Legislation:
 - Greater flexibility in timeline for transition
(Dec. 31, 2017; earlier if MSSP sites and managed care plans mutually agree and have met readiness criteria)
 - Statewide and local stakeholder processes will help inform benchmarks plans must meet for transition.
 - Local flexibility in designing MSSP transition plans and timelines.
