

**Mental Health Services Act (MHSA) Performance Review Report
Nevada County Program Review
June 30, 2026**

FINDINGS

Finding #1: Nevada County and their contracted service providers did not consistently enter a Full-Service Partnership (FSP) agreement with each client served under the FSP service category, and when appropriate the client's family. (California Code of Regulations, tit. 9, § 3620 (e)).

Note: The Department of Health Services (DHCS) defines an agreement as a signed agreement between the client, and when appropriate the client's family, and the Personal Service Coordinator/Case Manager.

Recommendation #1: The County and their contracted service providers must provide evidence of compliance that they consistently enter an FSP agreement between their client, and when appropriate the client's family, and the Personal Service Coordinator/Case Manager for each client served under the FSP service category. If there is no FSP agreement, provide an explanation of why there are none and what steps will be taken to become compliant with this regulation.
